Docket Number: P06691US0**USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT**

This collection of information is required by 37 CFR 1.51. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop Provisional Application, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

TITLE: METHOD AND MEANS FOR DOWNLOADING DATA
FROM A MACHINE

BACKGROUND OF THE INVENTION

This invention involves a method and means for downloading data from a machine, for example, in order to extract operational data from the machine by wireless or hard wire means.

The features of this invention are:

1. A system that would allow information to be downloaded from a machine's touch screen or PLC into a handheld device.

2. Information on the handheld device that can be downloaded to a PC.

5 3. Information that can be viewed or printed as documents or reports. (The information would consist of the information shown on the "Management Information Screen" of the touch screen.)

10 4. Options of methods to transfer information from the machine to the handheld device consist of:

 Infrared transfer (IR)

 Radio Frequency transfer (RF)

 Cable connection transfer

15 A PALM handheld device used with an infrared transmitter or with a receiver so that no covers, doors or enclosures need to be opened, and a short transmission time is used so that the signal is not interrupted.

 In operation, the PALM unit is associated with a P.C. and either hard wired to an auxiliary port or an I.R. data port, and downloaded to a standard format, Excel, Word, Lotus, or WordPad. That information is not able to be manipulated but just viewed and printed out.

 The following specifications should be present:

25 1. Ability to be able to transfer files to a P.C.

 2. Ability to be able to print this information out from a P.C.

 3. Ability to retrieve data from numerous machines in one plant up to six machines.

30 4. The hand held unit should be proprietary to the specific machines.

 5. Additional information from the touch screen may need to be transferred such as time, pressure settings, initials of the person gathering the data, name of product
35 being run, recipe, etc.

5 We claim:

1. A method of downloading data from a machine having a touch screen or PLC to govern its operation, comprising, taking a handheld control unit operatively associated with the touch screen or PLC that can be selectively actuated
10 to download data from the touch screen or PLC to a PC to be viewed or printed.

2. The method of claim 1 wherein the handheld control is hard wired to the PC.

15 3. The method of claim 1 wherein the machine is a meat processing machine.

4. The method of claim 1 wherein the handheld control unit
20 is connected to the P.C. via a wireless system.

5. The method of claim 1 wherein the handheld control is connected to the touch screen or PLC via a hard wired or wireless system.

25 6. A device for downloading data from a machine having a touch screen or PLC to govern its operation, comprising, a handheld control unit operatively associated with the touch screen or PLC that can be selectively actuated to
30 download data from the touch screen or PLC to a PC to be viewed or printed.

7. The device of claim 1 wherein the handheld control is hard wired to the PC.

35 8. The device of claim 1 wherein the machine is a meat processing machine.

5

9. The device of claim 1 wherein the handheld control unit is connected to the P.C. via a wireless system.

10. The device of claim 1 wherein the handheld control is connected to the touch screen or PLC via a hard wired or wireless system.
